

## **Applied Parasitology Laboratory Course**

**May 24, 2014**

The Applied Parasitology Laboratory Course is a one day workshop that focuses on parasitic infections of importance for clinical practice in Tropical countries. It throws the light on parasites from a Public Health view. The workshop covers the most frequent imported parasitic infections in immigrants and travelers. The course is especially intended for microbiologists, infectious diseases and Tropical medicine specialists and all practitioners interested in the laboratory diagnosis of parasitic diseases. It is a full day course and will include lectures, demonstrations and hands-on microscopy of various parasites.

### **Presentations and lectures:**

Azza ElBakry MD, DPH/MP
