

For the 5th straight year, academics, students, physicians, industry professionals, policymakers, and patient advocates gathered in Montreal at the McGill Summer Institute to learn, discuss, network, and build collaborations. 550 people participated in the 8 interactive courses, which provided new knowledge, lively discussions and hands-on learning experiences. The Summer Institute's unique platform continues to attract top-notch faculty and learners from around the world.

We thank all our funders, sponsors and partners for making the Summer Institute a major success over the past 5 years!
